

A message from Anthem Blue Cross

Earlier this week, we announced that credit protections for our members potentially impacted by the cyber attack will be available starting today. We're pleased to provide additional information that will allow your participants to begin enrolling at 2 p.m. ET.

Current and former Anthem members dating back to 2004 are being offered identity repair assistance and credit monitoring services via AnthemFacts.com. Affected members can start accessing these services prior to receiving a mailed notification from Anthem, which will be sent in the coming weeks. Members may access these services at any time during the 24 month coverage period.
