

Get answers to your health questions and concerns

MedExpert combines the power of high tech and human touch to educate our members and improve lives.

“What would the world’s top medical experts do for my medical situation?”

For any given patient with any given medical condition, there is a best path of care that will improve outcomes and reduce waste. MedExpert has built the only artificial intelligence system that continuously examines all peer-reviewed sources of medical evidence to produce current, accurate, and unbiased information on any medical condition or drug, in real time. Our technology determines who the best doctors in the world are for any condition and what these experts consider the standard of care.

With a toll-free call you will be connected with one of MedExpert’s on-staff doctors who use a new information system to examine medical research in real time and relay that information to you in a manner that is easy to understand and also actionable.

MedExpert’s staff of doctors, nurses and information coordinators promise to work with you for as short or long as it takes to solve a problem.

MedExpert can help...

- + Identify how the best in the world would treat your medical condition.
- + Explain your treatment options and test results.
- + Expedite your physician wait lists.
- + Transfer your medical records.
- + Carefully explain your medical records.
- + Consider whether a surgery is medically necessary.
- + Explain your medical bill.
- + Identify and connect you with support groups and other community programs that may enrich your life.
- + Coordinate your physicians.

... and much more
